FAST AND RELIABLE SHIPPING

Consistent, reliable and fast shipping and no surprises or excuses.

SIMPLY THE BEST

Biodynamic, non-GMO, and organic - sometimes less is more.

ALWAYS THERE TO HELP

Customer service just a text message or phone call away, 6 days a week, 18 hours per day.

HOLCD01

Holle Cow Milk Stage 1 Organic Formula + DHA (400g)

Age: From 0-6 Months

Yield: Approximately 100oz of Formula

NEW 2022 version of Holle without maltodextrin! Holle Stage 1 is suitable for feeding from birth onward (0-6 months) or if you are transitioning your little one from breastfeeding. This formula can also be used for preparing porridge, such as Holle rice or oat porridges, which we also sell. Holle formula is based on milk from cows raised on biodynamic farms in Germany that are Demeter certified. The Demeter standard is truly the gold standard in terms of animal welfare and biodynamics. Demeter dairy farms avoid practices such as the painful dehorning of the dairy cows. Per EU formula regulations, this formula also contains DHA (suitable for vegetarians). Other ingredients include essential vitamins and minerals to promote your baby's development and meet EU regulatory

- Only Demeter Certified Biodynamic Dairy Farms
- ✓ Vitamins A, C, D and E for baby's immune system
- EU Certified Organic
- ✓ Added DHA (vegetarian) and ARA

- No corn-based sweeteners
- No gluten
- ✓ No GMOs
- No Maltodextrin

biodynamic

requirements.

INSTRUCTIONS

Preparation for all powdered formulas (also consistent with US FDA guidelines):

- 1. Boil water freshly for each of baby's meals and allow to cool down to 120 degrees Fahrenheit (50 °C) before mixing with formula powder.
- 2. Pour in ½ of the necessary amount of boiled water into a clean and sterilized bottle.
- 3. Using the scoop provided with your box of formula (note that spoon sizes vary by brand and even lot), add the correct number of leveled scoops of powder (1 leveled scoop of powder per loz / 30ml of water).
- 4. Close the bottle with the nipple and cap and vigorously
- 5. Add the remaining half of the water to the bottle and shake again.
- 6. Cool to drinking temperature (approximately 98 degrees Fahrenheit or ~37 °C) and <u>ALWAYS test the temperature of the</u> milk before feeding to avoid scalding or burning your little one.

There are many mothers that regularly use distilled water without boiling it, apparently with no negative consequences. We cannot recommend this approach and there are actual reasons even the US FDA recommends pre-boiling tap or distilled water instead.

MIXING AND FEEDING INSTRUCTIONS (HOLLE COW STAGE 1)

AGE	BOTTLES PER DAY	WATER (OZ)	# OF SCOOPS
First Week	Consult Your Pediatrician		
2 to 4 Weeks	5-7	3	3
Month 2	4-5	5	5
Months 3-4	4-5	6	6
After the 4 th Month	3-4	7	7
